

An Unparalleled Approach to DeFi

Banking on AMM, GameFi, and multitasking NFTs, Pandora enables a holistic and disruptive decentralized PandoVerse that will transform the way people engage with DeFi, not just financially but also emotionally.

About The Project

Pandora is a next-gen decentralized ecosystem with a dual-token model and an inclusive incentive structure for traders and farmers.

Problem

Conventional DEXs often incentivize mainly farmers and lack rewards for traders. DEXs that do not adequately incentivize traders will eventually lose them to another protocol. The withdrawal of traders will then cause a decrease in token swap rates, which will, in turn, lead to fewer rewards for farmers. Farmers would also leave the platform over time because the rewards they earn are not enticing enough to keep them on board.

Unless we can solve this problem: **Conventional DEXs face an irreversible path towards failure due to the inevitable decline of popularity over time.**

Solution

What is needed is to build a better incentive structure for all users. Pandora's inclusive reward system offers traders and farmers sustainable income and multiple benefits in an attempt to maintain high user retention rates. Pandora attracts users and keeps them engaged by gamifying its protocol. Pandora creates a user-centered decentralized ecosystem where all participants are properly incentivized and empowered to make decisions on governance.

Pandora Spirit (PSR) Tokenomics

Pandorium (PAN) Tokenomics

PSR Token Tranches

PSR Burn

The burning mechanism of PSR ensures that as more users join the protocol, fewer PRS tokens will exist in circulation.

Why Pandora?

- Innovative & Inclusive DEX Model**: Pandora's improved DEX model enables an all-encompassing incentive structure for everyone involved.
- Secure Store of Value**: The multifunctional governance token PSR ensures capital gains and earnings stability for token holders through a diverse set of use cases as well as its deflationary and anti-dumping tokenomics.
- Earn While You Trade**: Pandora implements a one-of-a-kind trade mining system in the DeFi space that enables traders to earn rewards for every transaction made.
- Profit from Owning NFTs**: Pandora's inventive DEX joint-ownership scheme allows NFT holders to co-own the protocol, earn a portion of its revenues, and make crucial decisions about protocol changes.
- Make a Fortune with Zero Risk**: The unique decentralized jackpot system introduced by Pandora makes for an engaging and rewarding DeFi experience for all users.
